6: Moser and Tayler E.N-5 (1960-1961) 1967 SQ19 Tucano SQ19

123
437 would be carefully inspected by Indians we met later, who would disregard them if they considered them inferior work.

533 Sometimes we would play music we had recorded in the Amazon to
171 see what the highlanders' reaction was. Then we would play classical music or jazz. Usually a simple tune or one with a distinct rhythm conveyed something to them. There was some interest in Bach or Mozart, but none in Brahms. As for their own music, once we had shown our interest or they had heard the play-back on the recording machine, they all – with the exception of the Kogi – would play to us for hours, and the range of sounds and instruments was astonishing.

Astonishing, too, was the realization that an Indian besides being a cultivator, a hunter, a fisherman, a boat-maker and house-builder, besides knowing the tribal legends and myths and the arts of basket weaving, wood carving and design, was also a musician, not only playing but himself making, with considerable skill, a wide range of musical instruments.

534 Among the Tukano alone we counted fifteen such instruments. A jingle-rattle is admittedly not very difficult to play, but it requires skill to make one and to design it so that each shell produces a certain note. A panpipe or a deer-bone flute may not be difficult to make, but it takes practice and determination to play one.

534 The Indian is deeply involved in the natural world about him, and just
778 as he incises on a calabash the representation of a beetle or a frog, he will try
562 to imitate the calls of birds or the sounds of the forest. All his instruments
171 reflect this forest environment: snail and tortoise shells, deer-bones, nutshells and gourds. But his music is also deeply involved with myth and ritual. We found the giant *jurupari* flutes were never placed where women could see them. They were used during the ceremony to call their god. When the women heard the flutes, booming like alpine horns in the distance, they fled into the forest, not daring to return till the flutes had been returned to the stream bed. The sacred significance of many of the instruments may account for their elaborate designs.

000 Very little is known of the origin of Indian, as of all music. Perhaps it first evolved during religious ceremonies, through the waving of a stick in the air or its being beaten on the floor; or perhaps through the rustle of marsh reeds held in the hand and shaken as Severiano did during the ceremony of Canta Haí. This may have been the first sound to suggest the use of nutshells and seed-rattles.

773 When we were living with the Casacará-Motilon Alec Clark told us that
171 the Indians put the mark of a stag's antlers on their foreheads to bring them
825 luck. He also gave us his interpretations of the legend of the puma and the deer, from whom the clan was descended. In the Amazon the shaman is said
[777] to be able to disappear at will and travel through the forest in the guise of a puma, because this animal was the most dreaded of all. Both these animals
